

KEVIN HAZIEL CANCINO GAMBOA

Technic Bilingual Software Developer | Python, JavaScript & React | Passionate About AI & Code Quality
hazcang@gmail.com • [linkedin.com](#) • Veracruz, México

Professional Profile

Motivated and adaptable software developer with a strong foundation in full-stack development, UI/UX design, and database management. Intermediate Linux user with hands-on experience in Ubuntu, Fedora, Arch Linux, and derivatives, skilled at configuring, customizing, and troubleshooting environments. Proficient in building functional, scalable, and visually appealing applications using React, JavaScript, Python, and Node.js, as well as developing cross-platform desktop apps with Electron. Practical experience in AI model deployment, LLMs (Large Language Models), Stable Diffusion, ComfyUI, and prompt engineering on both AMD and NVIDIA hardware. Always seeking to expand technical expertise, especially in cloud services, automation, and system optimization.

Experience

Centro Universitario de Estudios Jurídicos (CUEJ) Technical Support	Veracruz, México 06/2024 - 01/2025
Provided hardware/software support for 50+ users, reducing ticket resolution time by 30%. Designed and executed SQL queries to automate student performance reports. Implemented operating system and application installations, improving workstation efficiency. Assisted the dev team with debugging/testing and wrote small automation scripts. Configured secure file-sharing solutions using Office 365 and improved user onboarding processes.	

Education

Universidad de Oriente Bachelor's Degree in Computer Systems	Veracruz, México 08/2022 - Presente
Centro de Estudios Cristóbal Colón High School Diploma	Veracruz, México 08/2019 - 07/2022

Skills

Languages & Frameworks: Python, JavaScript, Node.js, React, Java, C++, SQL, HTML/CSS, Electron, Visual Basic

AI & ML Tools: Stable Diffusion, ComfyUI, Hugging Face, Prompt Engineering, Model Optimization (AMD/NVIDIA)

Platforms & Tools: Git/GitHub, VS Code, Microsoft Teams, Office 365, Windows, Linux, iOS

Other Skills: Debugging & troubleshooting, Networking fundamentals, REST APIs, Database Management (MySQL, SQLite)

Projects

Linux AI Model Deployment — Set up and optimized local LLM and Stable Diffusion pipelines on AMD GPUs using ROCm and ComfyUI.

Python Budget Tracker — CLI tool to manage monthly expenses using CSV and pandas.

React Task Tracker App — Single-page app using React & JavaScript with local storage.

NoteVerse — Cross-platform note manager (React, Electron, TailwindCSS, SQLite) with offline-first syncing.

Movie Explorer App — SPA using TMDB API, React, Vite, and REST APIs.

Web Scraper Tool — Python + BeautifulSoup scraper exporting structured data to CSV/JSON for product listings, news, or articles.

Passions

Technological Innovation Passionate about technological innovation and the development of solutions that improve efficiency and user experience	Software Programming and Development Fascinated by programming and software development, specially in creating applications and systems that solve real problems	Continuous Learning and Professional Improvement Motivated by continuous learning and professional improvement. Always seeking opportunities to expand my knowledge
